one full night sleep

Sleep disorders are not just tiredness

They are a systemic health burden that demands medical attention

1 in 3

adults globally experience chronic Sleep insufficiency

45%

Sleep disturbance prevalence in MENA- Region studies

The melatonin Gap

Endogenous melatonin secretion begins declining from age 40

WHEN SLEEP FAILS. EVERYTHING FAILS

Cognitive decline

Impaired memory
Concentration decline
after chronic Sleep loss

Metabolic risk

Sleep disturbance
elevate cortisol
promote insulin
resistance accelerates
weight gain

Cardiovascular burden

Short Sleep associated
with Cardiovascular
risk

How DORASNOOZ restores the natural Sleep cycle

01

Binds MT1 / MT2

Melatonin binds sleep receptors in the brain's master clock (SCN) suppressing wake signals.

02

Resets the Clock

Re-synchronises the misaligned circadian rhythm correcting delayed or disrupted sleep timing.

03

Reduces Latency

Shortens time to fall asleep by 7-15 minutes without sedative CNS depression.

04

Deepens Sleep

Enhances slow-wave sleep architecture - patients wake refreshed, not groggy.

**The night is not the enemy
the misaligned clock is**

Prescribe the right sleep for the right patient

Approved indications

- ✓ Circadian rhythm disorders
- ✓ Shift work sleep disorder
- ✓ Age related insomnia
- ✓ Beta- blocher induced insomnia
