

Oral drops

# Kidoky

Growing bones  
need more than calcium.

Smart **D3** + **K2** support for  
calcium absorption and utilization.

Absorb better. Utilize smarter. Grow stronger.

# Vitamin D deficiency is the root cause of many problems

Healthy bone growth needs absorption, utilization, and mineralization.

During growth, children need proper nutritional support for bones, teeth, and muscles. Calcium alone is not enough if the body does not absorb it efficiently and use it properly in bone tissue.

## The Calcium Journey

Calcium Intake

D3 Absorption

K2 Utilization

Bone Growth

Because strong bones are built by smart calcium handling by vitamins **D3** & **K2**

Oral drops  
**Kidoky**

**supports the calcium journey  
from absorption to utilization**

**Vitamin D3 + K2 in one convenient  
oral drops formula**

**KIDOKY** combines two vitamins with complementary roles in bone development. Vitamin D3 1200 IU supports calcium and phosphorus absorption, while Vitamin K2 10 mcg supports proper calcium utilization and bone mineralization.

D3 helps the body  
absorb calcium

+

K2 helps its proper  
use in bone tissue

=

Stronger bones  
for a healthier  
growth

Two vitamins.  
One bone-growth concept.
